🌐 LinkedIn 🐙 GitHub 🌐 Portfolio

OBJECTIVE

Enthusiastic and adaptable graduate skilled in Python, Django, HTML, CSS, JavaScript, SQL, and Flutter. Eager to apply technical knowledge, gain hands-on industrial experience, and contribute to innovative software development projects.

EDUCATION

COLLEGE OF ENGINEERING THALASSERY

Sep 2022 – April 2025

- B.Tech in Electronics and Communication Engineering
- CGPA : 7.36

GOVT. POLYTECHNIC COLLEGE, KANNUR

June 2019 – April 2022

- Diploma in Electronics Engineering
- CGPA : 8.89

SKILLS

- **Programming Languages:** Python, JavaScript
- **Web Technologies:** HTML5, CSS3
- **Frameworks:** Django (ORM, MVT Architecture, Authentication, CRUD, REST APIs), Flask, Flutter
- **Core CS:** DSA, Object-Oriented Programming (OOP), RDBMS, Operating Systems, SDLC
- **Databases:** MySQL, PostgreSQL, SQL
- **Tools & Technologies:** Git, Power BI, PowerPoint
- **AI & ML:** ML Basics, CNN, Deep Learning

INTERNSHIP

PYTHON FULL STACK DEVELOPER TRAINEE

June 2025 – Present

QSpiders Software Training and Testing Institute

- Hands-on experience in Python, Django, HTML, CSS, JavaScript, and SQL development and testing.

FLUTTER DEVELOPER INTERN

July 2023 – Oct 2024

IMIoT Technolabs

- Developed cross-platform mobile applications using Flutter and Dart and integrated APIs and worked with backend

PROJECTS

SKILLBRIDGE ATTENDANCE API

April 2025

- Built and deployed a scalable REST API using FastAPI and PostgreSQL with RBAC for 5 user roles.
- Implemented secure JWT authentication and developed 13 endpoints with Pytest testing.
- Live API · Source Code

NETFLIX CLONE WEB APP

March 2025

- Built a full-stack Netflix-style web application using Python and Django with authentication, dynamic content rendering, and database integration.

BLOOD GROUP DETECTION USING FINGERPRINT

Sept 2024 - April 2025

- Developed a CNN-based model to predict blood groups from fingerprint images using image preprocessing and classification techniques with Python and TensorFlow.
- Achieved 96% training accuracy and 89% validation accuracy and built a real-time blood group detection interface using Streamlit.

INTRAVENOUS INFUSION MONITORING AND CONTROL USING DRIPOMETER

Feb 2024 - July 2024

- Designed and implemented an IV infusion system using a dripometer and Arduino (C/C++).
- Ensured precise and automated fluid administration with real-time monitoring and control.

COURSES

Artificial Intelligence Fundamentals — IBM

Google EduLabs Course in Generative AI
